CPU: Intel 2GHZ Dual CPU/Core Duo

RAM: 8GB | DVD Drive | Hard Drive 80 GB of free space | HD Configuration: Raid 1, Raid 5, or Raid 10
100/1000 Network Card | Monitor Resolution 1024x768 or Greater

Backup Software and External HD or NAS Storage device for onsite backup

UPS Battery Backup + Remote Data Backup service subscription, IE Carbonite, Mozy, or Crashplan

ALERT: It is absolutely necessary your operating systems match these requirements. Please carefully review each of the following alerts:

ALERT: Windows Server 2003 SBS CANNOT RUN FloorManager | JobRunner v11. A Mac server can be installed including data and battery backup for under \$2,000.00, so if you already have Windows Server 2003 SBS you might be excited to upgrade to Mac server's improved performance.

ALERT: Windows Server 2008 SBS is STRONGLY DISCOURAGED, (Windows Server 2008 R2 and Windows Server 2008 Standard Edition SP2 are supported) **and can be used ONLY IF CERTAIN SBS FUNCTIONS ARE DISABLED PRIOR TO INSTALLATION of FloorManager | JobRunner v11.** If the isolated server for FloorManager | JobRunner v11 must use Windows Server 2008 SBS please contact support@pacific-solutions.com or call 800.201.6509 for critical information, prior to the installation of FloorManager | JobRunner v11.

Final hardware recommendations can be made by Pacific Solutions after evaluation of your concurrent user volume and number of remote access points. **Most of our management system sales are to companies switching from other flooring software.** They make the investment to move into Pacific Solutions for greater control, less people time, and ultimately, more bottom line profit.

To Your Greatest Profit,

Pacific Solutions

“Pacific Solutions sets the standard for collecting client feedback and implementing the benefits that we should all emulate in our individual business.” GARY CASE CARPET COLLECTION LOCKPORT, NY
